Conceptual note

The National Conference on Science and Technology is a biannual event, which is focused on the presentation and discussion of scientific research results, preferably original research works, which are beyond literature reviews and description of phenomena, cases or occurrences. Only in special cases the organizing Committee reserves the right to invite personalities who decisively contribute to promote this event, or are invited to give a speech on topic(s) commissioned by the organizing Committee.

The 1st Conference was held in 2009, promoted by the Ministry of Science and Technology, and it has established itself as a platform of excellence in the search of solutions for the Angolan problems. The average number of participants in the last three editions was about 300..

In the last three editions held (2009, 2011 and 2013), this forum was attended by about 1000 scientific researchers, among them, about 80 foreign participants from countries like South Africa, Botswana, Brazil, Canada, Cuba, Spain, USA, France, Macau/China, Mozambique, Portugal and Zimbabwe. A total of about 180 communications were presented orally and in the form of posters.

The 4th National Conference on Science and Technology has the motto "**Together for Strengthening the Insertion of Science, Technology and Innovation in the Country's Development Strategy.**" It will be held in September, from 9th to 11th 2015, in Luanda, and has been announced from January 2014 in the 5th Edition of the Annual Calendar of Scientific Events, Angola.

The evaluation of the submitted abstracts is a key moment, as it determines whether the works are selected to be presented as "oral communication" or "poster" or being "not accepted".

Authors of accepted abstracts are notified to prepare their presentations or posters to present in one of the working sessions of this event.

The Organizing Committee

Objective

To present and discuss scientific research results, to share and exchange experience on the contribution of science, technology and innovation in the resolution of the social problems and in the promotion of the sustainable development.

Outputs

- ⇒ To present and discuss scientific research results;
- ⇒ To share experience on the implementation of Policies on Science, Technology and Innovation and expected impact;
- ⇒ To contribute for the management of the environmental issues;
- ⇒ To contribute for the strengthening of food and nutrition security;
- ⇒ To promote the strengthening of public health and the systematization and enhancement of the indigenous knowledge;
- ⇒ To promote the use of technology in supporting sectors and at the service of society.

Target Audience

Managers, scientific community, experts, professionals and students with interests in the issues, according to the above topics.

Topics/Panels

PANEL I – Science, Technology and Innovation and collaborative opportunities.

PANEL II – The scientific research for the strengthening of food and nutrition security.

PANEL III – The application of science and technology in the management of natural disasters and environmental issues.

PANEL IV – Science and technological innovation for the strengthening of the public health.

PANEL V – Technologies at the service of society.

Round table

“The insertion of science, technology and innovation in the country’s development strategy”

Side Events
